HANDCUTTER 428

Scratching Tool acc. to Clemen

A practical instrument with tungsten carbide tip acc. to Clemen. The instrument is used for standardised scratching of corrosion test samples. A test tip acc. to van Laar is additionally available.

Model 463

Scratch Stylus acc. to Sikkens

This hand operated instrument complete with carbide cutting tip provides a convenient means of scoring a mm (optional mm or mm) wide rectangular track in a surface coating - for corrosion tests.

CORROCUTTER 639

Test Panel Scratcher

Comfortable, manual instrument for fatigue-free application of defined scratches on coated specimen panels intended for corrosion tests. Provided for use of scratching tools in accordance with Clemen, van Laar and Sikkens frequently used in practice. Avoids the great strain

usually put to fingers and wrists when scratching specimen in large series. Using adequate scratch templates available as accessories, it is possible to apply Åross scratches as well as °/ ° St. Andrew's cross scratches.

Our solutions in testing technology for you.

ERICHSEN is your capable partner for all questions concerning modern testing techniques. We are in the position to develop and fulfil your special measuring and testing requirements to secure your demands for a high level of quality in manufacturing. Convince yourself of our competence.

Please request the condensed catalogue or individual brochures of the product group you are interested in, or visit our website: www.erichsen.de

Service: In our quality control department we produce Manufacturer's Test Certificates and Calibration Certificates for most of our products.

Recalibration of equipment already supplied is available at any time.

Furthermore, our service technicians can visit you in order to check and calibrate your equipment in situ.

Sheet metal testing

- Cupping Test
- Stretch Draw Test
- Deep Draw Test

Surface testing

- Formability of Coating Material
- Viscosity and Consistency
- Density
- Grain Size and Pigment Dispersion
- Opacity and Hiding Power
- Film Application
- Drying
- Film Thickness
- Flexibility
- Adhesion
- Impact Resistance
- Hardness
- Abrasion Resistance and Scrubbability
- Chalking
- Gloss
- Colorimetry
- Brightness
- Porosity
- Print Coat Instruments
- Special Test Instruments

Corrosion testing

- Specimen Preparation
- Condensation Water and Salt Spray Test
- Cyclic Corrosion Test
- Weathering Test

Materials testing

- Load Cells
- Tension and Compression Testing Machines
- Torque Measuring Devices
- Calibration Devices
